Defects Found: Coloured Plastics, Foreign Material, Light Stalks.

Safe Food
Clean Food

SORTING SAMPLE

Throughput Capacities per Machine in 1,000kg per Hour Units:	Z+1	Z+2	Z+3	Z+4	All figures are indicative only.
	0.2 - 0.3	0.4 - 0.6	0.6 - 0.9	0.8 - 1.2	

ACCURACY OF SORT

This photograph shows actual sorting results from a SORTEX Z+ optical sorter. Please note that the accept and reject quantities that can be obtained are interdependent and also depend on the input contamination. The throughput capacities shown are also dependent on the input contamination and the required quality of accept and reject.
